

Wireless Connectivity Solution

Trust the managed wireless connectivity solution used at thousands of enterprise sites across South Africa.

In today's digital age, your enterprise needs reliable, secure connectivity which is essential for accessing, processing and disseminating online communication. Our managed wireless connectivity solution is a quick to deploy primary or secondary access for your customer facing sites. Each site is monitored via the BCX M2M router that intelligently switches between two LTE networks and offers multiple layers of network security.

PRODUCT DESCRIPTION

Versatile, quick to deploy wireless connectivity deployed at enterprise sites across South Africa as primary access or back-up an enterprise wide area network. Can also be used as reliable access for internet breakout or SDWAN.
