

# A flexible mobile communications solution that unlocks business productivity

Now more than ever, achieving business objectives no longer means being confined to office premises. In order to improve efficiency, productivity and overall competitive edge, employees need to be able to communicate and collaborate from anywhere, at any time - using any device over any network.

## WHAT IS COMMSKY?

CommSky is a flexible mobile unified communications solution that delivers office communication services using an application on a mobile device. The solution works over any wireless access and delivers instant messaging, voice and video calls, voice messaging, desktop sharing, conferencing, and presence from your mobile device.

This solution provides budget transparency, allowing your employees to enjoy the freedom of making unlimited calls to any fixed or mobile number whilst only paying a single flat rate per user for a comprehensive feature set.

## WHAT IT DOES

As a complete mobile unified communications solution, CommSky delivers all your office communications applications using an application on your mobile device. Applications include voice communications, voicemail, integrated messaging, presence, instant messaging, mobility and web conferencing. CommSky supports Android, iOS (including Apple devices such as Apple Watch and Mac), as well as Outlook, Sharepoint, and Windows.

## HOW IT WORKS?

Using the application, employees will have unlimited calling and access to comprehensive communications features including instant messaging, voice and video calls, voice messaging, desktop sharing, conferencing and presence, from any mobile device.

## WHY CHOOSE BCX?

CommSky provides user agility such as the freedom from being office-bound, the ability to work from anywhere at any time, and being productive while on the move.

BCX has the technological expertise and capabilities to provide a cloud-based solution which provides:

**Unified communications  
from a mobile application.**

**Unlimited calling  
on all main types.**

**A fully managed  
service.**
