BCX **EXA**

WHAT IS DIGITAL ARCHITECTURE SERVICES?

If your company needs a clearly defined architectural scope with improved performance, you have to choose a partner who is all about action. A partner that is good at creative problem solving.

Our technology-agnostic solutions and recommendations are based on providing the best outcome for your organisation with service that will be the best fit for your requirements. We use your enterprise architecture and business strategy to create a clearly defined architectural scope that serves as a basis for intelligent decision-making, underpinned by industry best practice standards [TOGAF].

WHAT DOES IT DO?

Our digital architecture services include:

- Solution Architecture Assessments
- Enterprise Architecture
- Business Transformation, Strategy and Planning
- Solution and Product Evaluations
- Technology Consulting
- Architecture Roadmaps
- Implementation of Architect Frameworks and Tools
- Business Process Engineering.

HOW IT WORKS

We provide a full suite of Architectural Services following defined processes, with defined sub-processes provided as an end-to-end packaged service or componentised to meet your requirements for:

- Strategy that includes Business Strategy Support and Alignment, ICT Strategy Development, Architecture Vision Model and Support for Strategic Planning.
- EA Analysis, that includes Current State EA Model, Future State EA Model and EA Recommendations.
- EA Roadmap, that includes defining Business Capabilities, identifies Business Change initiatives and offers a Business and IT Capability Incremental Approach aligned to Risks, Priorities & Funding.
- EA Governance and Assurance, that includes the establishment of an Architecture Governance Framework, defines Architecture Governance Guiding Principles and creates, simulates and implements Governance Processes.
- Digital Transformation, that includes Digital Roadmap Definition, BCX Exa Digital Reference Architecture and execution of Digital Reference Architecture.

WHY CHOOSE BCX Exa?

We have more than 35 years of Architectural and Solutioning experience, with a tried and tested Digital Reference Architecture and vast skills to implement your solution.
