

ROBOTIC PROCESS
AUTOMATION
CAN BE COMPLEX.
**IT CAN ALSO BE
UNCOMPLICATED.**

BCX **EXA**

Choosing the right partner to maximise organisational productivity and drive transformation is important if you want to stay ahead of the pack. If you want to use robotic process automation, your partner should have a fresh innovative approach.

WHAT IS ROBOTIC PROCESS AUTOMATION (RPA)?

BCX Exa's RPA Solutions are software based that mimics what people do on their computers. It reduces the need for repetitive and routine tasks across multiple applications within an existing workflow.

WHAT DOES IT DO?

BCX Exa's RPA automates repetitive and rule-based activities. Our Software based RPA Bots, access systems and applications through Application Programming Interfaces [API's] to execute defined tasks in short period of time.

HOW IT WORKS

RPA software:

1. works by "recording" how tasks are performed by a human on a computer
2. "learns" how to replicate particular tasks
3. uses multiple bots to interact and integrate with different systems to create a Digital Workforce in your business.

WHY CHOOSE BCX EXA?

Our simple end-to-end solutions ensure that we can help you plan and implement strategies and initiatives in a fast, efficient and cost-effective way. We do not only develop and implement bots, but help our clients to establish an effective digital workforce managed by our tried and tested implementation methodology, relevant to the unique South African labour culture. BCX Exa is a strategic implementer of RPA services and will guide you to make the right decisions to ensure sustainability and maximum value.

Our RPA solution offers low cost, high-performance infrastructure to ensure bots operate in an optimum environment. We are a low-cost, high scale provider of automation services which can be complemented by the powerful suite of BCX services and robust shared infrastructure.

FEATURES AND BENEFITS

Features	Benefits
RPA mimics employee activity by logging on, capturing data and orchestrating applications and systems autonomously.	RPA enables processes to be executed approximately 15 times faster than a human would.
Smart software that enables rules-based outcomes which are applied instantaneously.	A return on investment (ROI) of 220% and a payback period of 15 months.
high-volume, repeatable tasks that are mundane, error-prone and time-consuming.	Avoids costs for recruitment, training, office space, equipment, software and supplies.
Our RPA solution is configured by operations employees. We can configure a typical process to production strength to be operational within six weeks.	RPA reduces turnaround times by an average of 60% - 80%, working 24 hours a day, 7 days a week, 365 days a year.
Multi-step tasks across multiple systems to process transactions, manipulate data, trigger responses and send reports.	100% accuracy, with no human errors and no rework.
Bots scale up and down, switching tasks according to planned and unpredicted demand, without having to recruit additional staff.	Improved security [reduces fraud], while driving compliance to make it fully auditable.

PRODUCT OPTIONS

PRICING MODEL

Our RPA product pricing is tailored to your unique process requirements and automation ambition.

SERVICE COMPONENTS

- We do a RPA process opportunity assessment to build a targeted portfolio of processes that yield high value in return.
- **Automation development and deployment:** We identify good process candidates before we commission our RPA developers to create and test required automations for deployment into a production environment.
- **Robotic Maintenance:** After a bot is placed into a post-live production state, you may require periodic updates to the design of the process. You can enter into a maintenance contract with BCX Exa for a set allocation of hours per month for bot maintenance.
- **Co-Created RPA:** We work with you to build a tailored RPA Centre of Excellence in your environment. BCX Exa involves critical RPA SMEs to guide the strategy and implementation and key members of your staff are involved in creation and learning.
- **RPA Automation Factory:** We provide a set container of capacity to use in any of your RPA development and operational needs.
- **Robotic Monitoring:** We offer a service legal agreement to monitor a bot in production on a day-to-day level to ensure operations are executed as expected.

AVAILABILITY

This product is available nationwide. For more information and pricing details, contact your account manager, or email BCXExa@bcx.co.za
