

SCENARIO:

Security threats are becoming an unavoidable reality and growing at a rapid rate in a market environment where more businesses are taking their critical operations to the Cloud.

CHALLENGE:

THE BIGGEST CHALLENGE FOR THEM NOW IS BECOMING THAT OF A 'BALANCING ACT' BETWEEN:

1.

Securing critical assets and business processes and protecting the enterprise from attacks.

VS.

2.

Providing reasonable assurance to customers and regulators about their security posture and compliance status.

Companies require reasonable assurance that their core business processes running on critical IT and Data Assets are in safe hands and well protected from malicious insider and outsider threat actors.

WHAT ARE BCX'S CYBERSECURITY RISK, AUDIT, ASSURANCE AND COMPLIANCE SERVICES ?

Companies require reasonable assurance that their core business processes running on critical IT and Data Assets are in safe hands and well protected from malicious insider and outsider threat actors.

HOW IT DOES THIS?

Effective delivery of Cybersecurity risk assessments and enforcing compliance results in the satisfactory assurance and management of security risks and threats at a level deemed acceptable to an organization's stakeholders.

WHO NEEDS IT?

Companies require reasonable assurance that their core business processes running on critical IT and Data Assets are in safe hands and well protected from malicious insider and outsider threat actors.

HOW THIS SERVICE SUITE BENEFITS YOUR BUSINESS?

- ▶ Achieves Cybersecurity compliance while reducing the burden of external audit engagements and saves you money. Existing personnel can focus on other pressing requirements.
- ▶ Gives you peace of mind about your security posture and compliance status.
- ▶ Meet your specific and unique Cybersecurity requirements.
- ▶ Achieve an acceptable security posture level for your business.
